CLIFFORD P. CLARK III, M.D., P.A.

Plastic surgery, a continually evolving surgical art form, is Dr. Clifford Clark’s passion.

Having established a nationally and internationally recognized plastic surgery practice in the Winter Park area over the last thirteen years, Dr. Clark is widely known for his work in facial rejuvenation, and is sought out to lecture on the topic. To maintain a leading edge in his specialty, Dr. Clark participates in numerous FDA studies and his surgery center, Orlando Aesthetic Institute, has become a center of excellence for clinical research.

Dr. Clark has received multiple research honors and has written numerous publications. He is also an assistant clinical professor at the University of South Florida and enjoys teaching plastic surgery residents. But it is the recognition that he has received by both local doctors and his patients as a Top Doctor in Orlando magazine and Orlando Business Journal that distinguishes him and his staff for their excellence in standard of care.

Early training in painting and a medical lineage set the stage for his synthesis of art and science—the essentials of beautiful plastic surgery. However, he is quick to acknowledge the generation of plastic surgeons before him that provided the entrée to the world of plastic surgery.

Dr. Clark’s educational resume includes undergraduate studies at Tulane and Florida State University and a medical degree from The University of Florida. He continued his medical training in Texas with a general surgery residency at Baylor University Medical Center and a plastic surgery residency at University of Texas Southwestern, considered one of the best schools for plastic surgery in the country.

Come and see what makes Dr. Clark’s practice exceptional. He and his staff look forward to sharing their expertise with you about the full range of cosmetic plastic surgery of the face, body and breast, and the latest in nonsurgical treatments.
